

## Travel plans

---

You and a group of colleagues are attending an international conference in ..... . After the conference you plan to spend three extra days together being tourists in that country.

Use the web-sites suggested by your teacher to find information and advice about where to visit in the country and where to avoid; what to pack; what to buy; what to do in the case of emergencies.

Prepare a rough schedule for the three days which includes contingency plans for any possible problems.
